

Key qualifications

Torstein is an experienced program- and project manager working 20 years with large national and international corporations of banking and finance, utilities and risk management.

He is currently managing a team that delivers a new internet and content management solution for the world's largest risk management company. His team also recently delivered the enterprise search solution for the same company.

Torstein has more than 10 years experience with the combination of IT and banking/finance and held the position of Assistant General Manager for IT projects and systems on international cash management in one of the largest financial institutions in the Nordic region for a 5 year period.

Torstein has also several years experience in the energies and utilities market as he held the position of Chief of Projects in an IT consultancy company that delivered solutions and services to the power market in northern Europe.

As a Program and Project manager, he has three years experience with managing teams engaged in implementing document and record management solutions. He has also led a team of software specialists, onshore and offshore, in the migration of more than a dozen legacy systems' data into one.

Torstein has extensive experience in procuring and managing offshore consultants for the purpose of achieving the best balance between capability, capacity and price. He also has extensive experience in contract negotiations.

Torstein is a Bachelor of Computer Science from the University of Oslo, and has an economics degree from the Norwegian School of Business Administration, NHH.

He is a results-oriented and goal-directed manager. He has a great ability to motivate people to get things done, and cooperates easily with people from different environments and cultures.
